

Arts + Tech

# *Introduction to Weaving*

Join us at West Michigan Center for Arts + Technology (WMCAT) for a three-week studio exploring the fiber art process of weaving. Participants will be introduced to a range of weaving techniques, while exploring both traditional and nontraditional approaches to process and materials. You will practice skills of observation, response, and analysis and leave the course with a completed tapestry and an appreciation of weaving. This class is for those age 55 or better, of all skill levels.

## ABOUT THE INSTRUCTOR

Crystal Drake is an art therapist and teaching artist. While attending the School of the Art Institute of Chicago, her work focused on the parallels between fiber arts and healing. She is passionate about providing older adults opportunities to learn a new skill set and to further engage them within their community.
